

Lake Towada is a caldera lake which formed as a result of a series of volcanic activities, and is surrounded by mountains of 600-1000 meters high. The volcanic activity continues over two hundred thousand years.

The excellent way to feel the lake itself is the cruise, with the breeze of the lake and the scenic spectacle of the forest and water.

Experience the magnificent power of the long history of the earth, and the changing colour of seasons. Enjoy!
