# Feel the power and breath of Nature with your all five senses

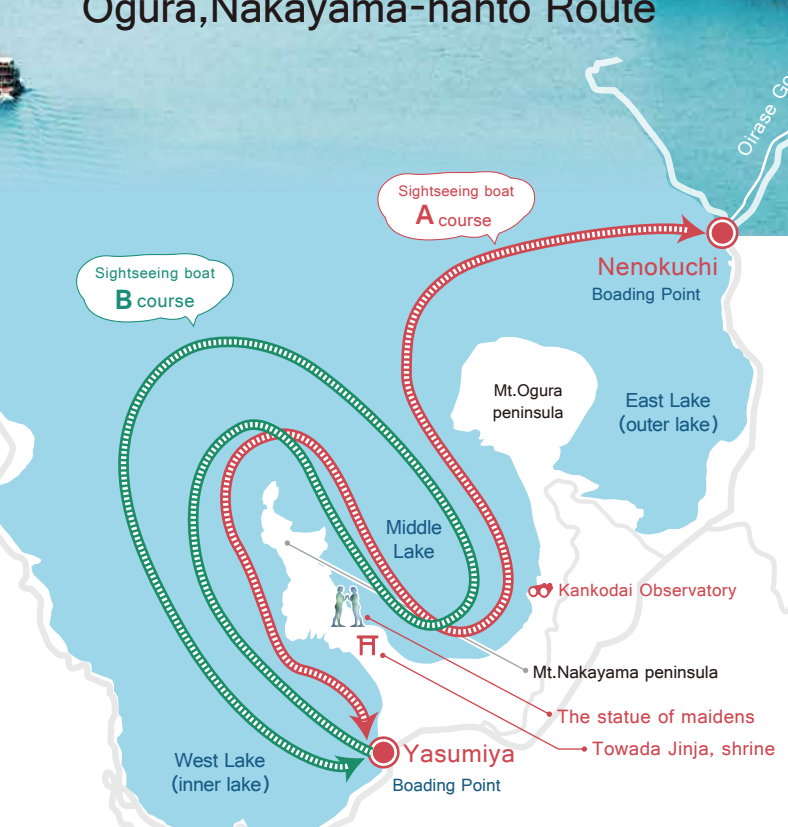

Lake Towada is a double-caldera of some volcanic activities, and is surrounded by various mountains of 600-1000 meters high, such as Mt. Ohanabe and Mt. Towada.

The volcanic activity of the lake began before one hundred thousand years ago. That activity had made a stratovolcano of lava & ash, however, the enormous eruption which had been happened before thirteen thousand years ago caved the stratovolcano and made the original shape of the present Lake Towada.

You can feel the amazing power of such eruption and feel long period of the time for these formations.

**The statue of maidens**  
Two women in nude are facing each other. They express through a grand nature & a calm spiritual landscape, and their foot is steady on the pedestal to stand harsh natural environment of this area.

**Towada Jinja, shrine**  
Until Edo era, this shrine had been a center of "Towada beliefs (a lot of people believed that Lake Towada was just God in itself)", and had deified "Seiryuu" which is a blue dragon god. This is mystery place where a breath of "Seiryuu" may be heard even now.
